

RTS Adapter

High-speed RTS connectivity easily

Low-latency high-speed connectivity to RTS exchange and real-time data feeds

Introduction

Strong experience in Software Development for Financial sector and deep technical expertise in real-time connectivity to the exchanges inspired LUXOFT Financial Services to provide a technology platform for a direct connectivity of Order Management and Market Data Systems to the RTS exchange.

Business Value

Financial institutions benefit from direct real-time connectivity of their full-fledged OMS and MDS to the RTS exchange and market data feeds without a need to use additional intermediate servers like QUIK.

Product companies attract new clients expanding their software product functionality by adding lightweight high-speed RTS exchange connectivity to the list of features.

World-class LUXOFT support of all new changes in upcoming releases of RTS API, especially in actively growing market data segment, saves enormous efforts and money. Leave low-level technical aspects to the expert, concentrate on your primary business.

Inside

Rock solid, lightweight real-time Platform Core built with fastest C++ compilers for Windows and Unix-based platforms. Concise and flexible pluggable architecture allows interconnections of a rich variety of:

- OMS/EMS and MDS proprietary interfaces
- FIX and FAST protocol dialects
- Programming languages and stacks build with C/C++, Java, Microsoft.Net and Web Services.

Technology platform for a direct high-speed low latency connectivity to the RTS exchange and highest quality support of upcoming changes in the RTS interfaces from a leading software development company in Eastern Europe

- Direct connectivity to the RTS Exchange and market data
- Support for all upcoming changes in RTS interfaces
- Lightweight high-speed Core with variety of clients
