

Travel & Hospitality

SHAPING THE NEW WORLD OF DIGITAL TRAVEL

Our Services

Digital Sales and Client Services Solutions

Enhance your loyalty programs and service to improve the customer experience while introducing new revenue streams. We provide a range of online portals, mobile apps, kiosks and autonomous technology specifically for your industry:

- Voice recognition and natural language processing
- Facial recognition
- Loyalty programs – from mobile apps to loyalty lounges
- Digital identity
- Online and mobile commerce (cross-sale systems, POS)
- Booking engines
- Travel social services/UGC
- Robotics
- Digital content strategy and design
- Distributed ledger technology, Blockchain

Operations Support Solutions

Enable a more collaborative, connected and productive workforce by streamlining operations through business process automation. Our solutions are designed to lower total cost of ownership while promoting higher-value collaboration:

- Digital workplaces
- Employee training and communications systems

- Robotic business process automation
- Neutral analysis (GDS)
- Traveler information platforms/data warehouse
- Localization
- Route analysis
- Predictive analysis systems and visualization
- Payment and financial transactions settlement
- Back-office infrastructure monitoring systems
- Integration with travel providers

Technology Leadership and Consultancy

We provide robust, flexible delivery models for migrating end-to-end product and operational systems. We allow you to focus solely on your core business.

- Cybersecurity
- Process audits and quality testing
- Systems integration and support
- Nearshore, offshore and on-shore delivery model
- Digital strategy

From vision and strategy to software engineering and support, Luxoft helps you solve your complex business challenges and enhance your competitive advantage.

Luxoft is your trusted partner for service, workplace and operational systems. With our industry expertise and highly skilled engineers, you get scalable business-changing solutions designed to achieve greater service quality.

Take full advantage of innovations that enable new business models, while embracing traveler personalization and mobility. Our quality engineering and consultancy is proven through long-term partnerships with over 50 major travel, logistics, hospitality and public transit organizations. We enable end-to-end delivery – transforming your business and uncovering new opportunities.
