Luxoft, a DXC Technology company, is proud to be a **Temenos-certified global partner for managed upgrades,** delivering exceptional outcomes for our clients through our deep industry expertise, innovative solutions and proven capabilities. At Luxoft, we have one of the largest global Temenos practices, with over 200 employees worldwide.

Temenos upgrade expertise

30+ Transact upgrade certified consultants

25+ successful upgrade executions

10+ Transact upgrade experiences per team member

7+ Transact upgrades to latest framework/ release R21/R22

4+ complex system transformations

3 regional competencies/ capabilities

3 upgrades currently in progress

Upgrade enablers

Upgrade analyzer

Scoping tool for the client environment which provides:

- Overview of Transact setup and configuration
- Provides details on local customization and complexity
- Key technical impacts on local customizations

Data comparison

Transact specific data comparison tool to compare data from two environments:

- Developed in Python
- Can be executed from UI or through command line scripts
- Outputs can be downloaded in Excel, doc. and JSON format

GL comparison

Tool exclusively developed to compare the GL data from two Transact environments. Output provides:

- Insight on financial reporting lines configured in Transact
- Transactional level info on the differences

Object explorer*

Tool that is used to provide insight on Transact components:

- Parameterized configuration, hence local params can also be included
- Analysis is performed outside of Transact

* Available in Q2 2023

Benefits

- ☑ **Arrive** at accurate estimates and timelines for upgrade projects
- ☑ **Helps identifying** key project dependencies (GPACK, modules, etc.)
- ☑ Identify any **financial differences** or **GL mismatches** occurring post-upgrade COB
- ☑ Identify **functional issues** post-upgrade
- ☑ **Aids in ensuring stability** of the system post-upgrade
- ☑ **Compare** key Transact tables post-upgrade to validate completeness of conversion and to identify potential data inconsistencies / discrepancies
- ☑ **Helps identify** used / unused components in a Transact implementation
- ☑ **Provides** technical catalog of local developments

Luxoft and Temenos:
Strategic alliance partnership for the future
