

Connected Mobility — Telematics

Case study

Client:

A complete solution for the development and testing of telematics applications

Technologies and tools:

V2X

TCU

SoC

VCs

We help clients with the development, testing and integration of telematics applications, and support with V2X use cases and technology.

Key offering

- Reliable telematics service applications
- Programming for telematic control unit (TCU) devices
- Enabling communication between vehicle controllers (VCs) and System-on-Chip (SoC) TCU parts

Services

Specification

Proof of concept

Algorithm development

Series development

Implementation

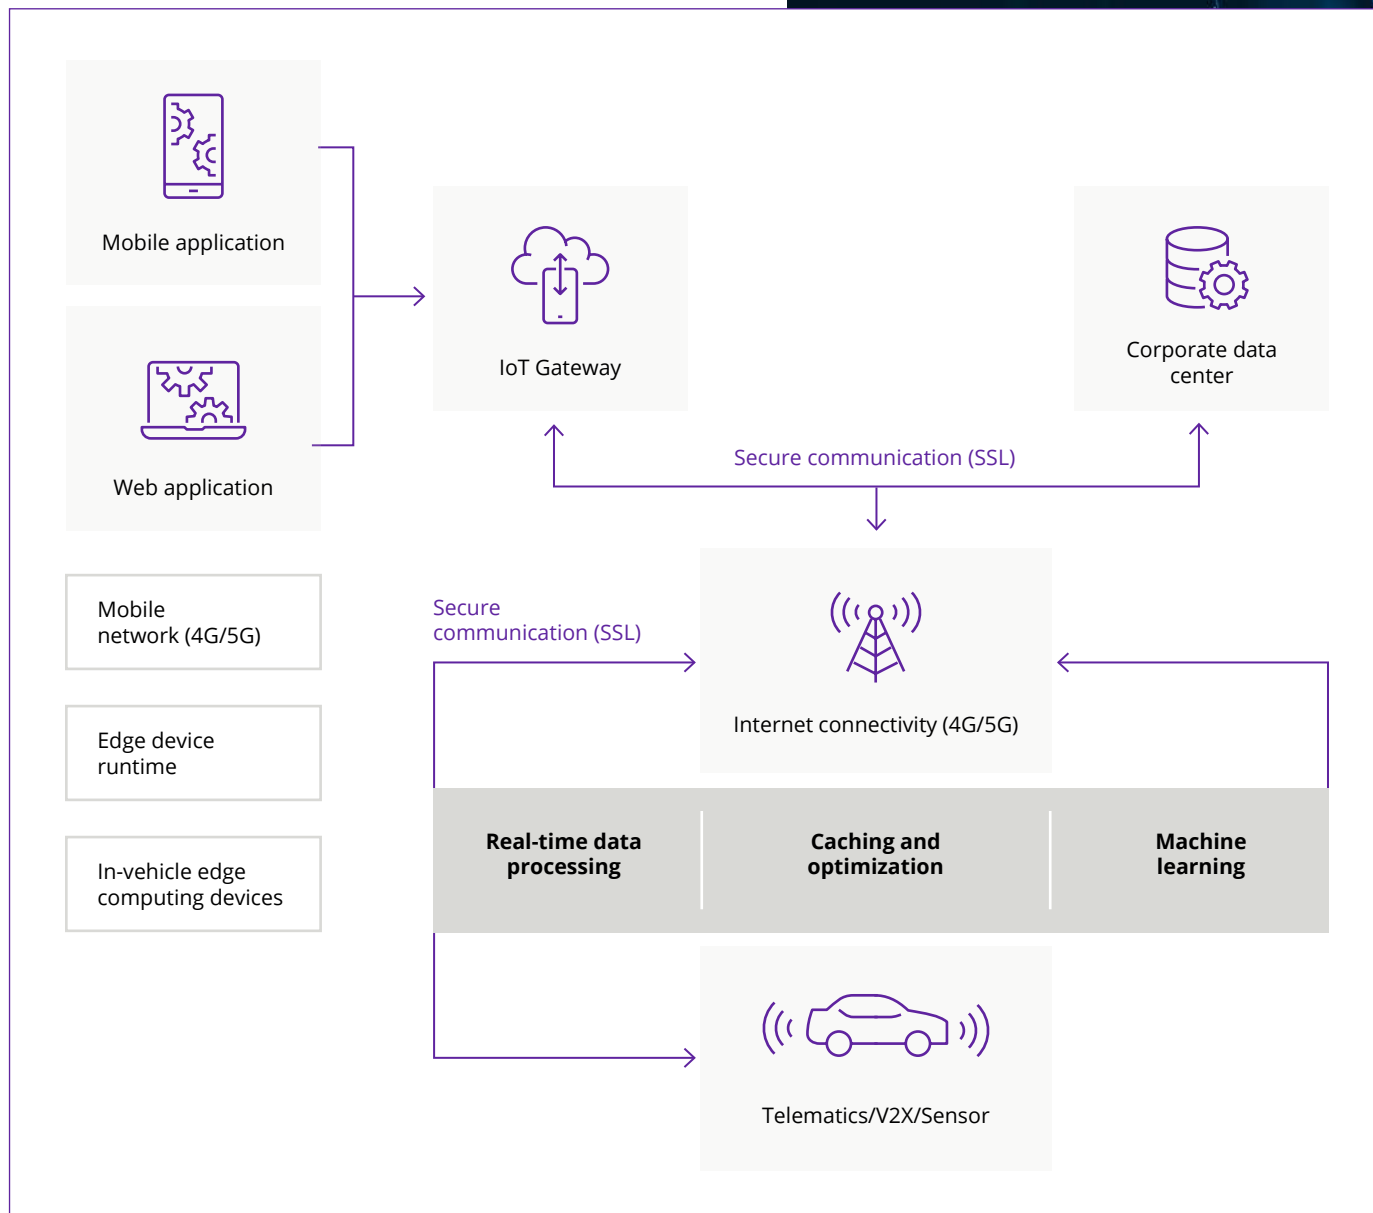

Integration

Testing

Customer story

About Luxoft

Luxoft is the design, data and development arm of DXC Technology, providing bespoke, end-to-end technology solutions for mission-critical systems, products and services. We help create data-fueled organizations, solving complex operational, technological and strategic challenges. Our passion is building resilient businesses, while generating new business channels and revenue streams, exceptional user experiences and modernized operations at scale.
